**Sowing seeds of values and culture**

If there is any institution that can legitimately claim to be world-wide, it is probably this school. Sowing seeds of values, watering them with ethics, nurturing them with honesty, traditions, harvesting them with strength of mind and thoughts, hence cultivating plants of today into success trees of tomorrow. Schools are to foster a child's rationality that could best prepare the child for the world, they would face when they grow up. In Mount Litera Zee School, Mohan Nagar they always have been a strand of educational thought that is strengthening the child's thoughts should be the chief business of the school and not just an incidental outcome-if it happened at all.

One of the significant aim of education is to produce learners who are strong in mind, that is to say, learners should understand ideas that are important, useful, beautiful and powerful. Another is to create learners who have the appetite to think analytically and critically, to use their learning's to enhance their own lives and also to contribute to their society, culture and civilisation.

*(Written by Meenakshi Sawhney, Director Operations, BLS Mount Litera Zee School)*

*(The article also mentions: Training and Development, Reema Dhevan, Deputy Director, IHS said that the institute has planned to conduct such development seminars in the coming future.)*
